

PORT-A-MAST™ Solutions

First Responder™ – “The *only* direction you should take in disaster situations.”

OMJC Signal First Responder™

The trump card for worst case scenarios. The First Responder™ is a speciality traffic trailer outfitted to be the immediate disaster relief during power loss. It is designed for the unavoidable need to continue intersection signals during various types of emergencies. The First Responder is fast to deploy, self-sufficient, and cost effective.

First Responder Features:

- **Ready and Waiting**

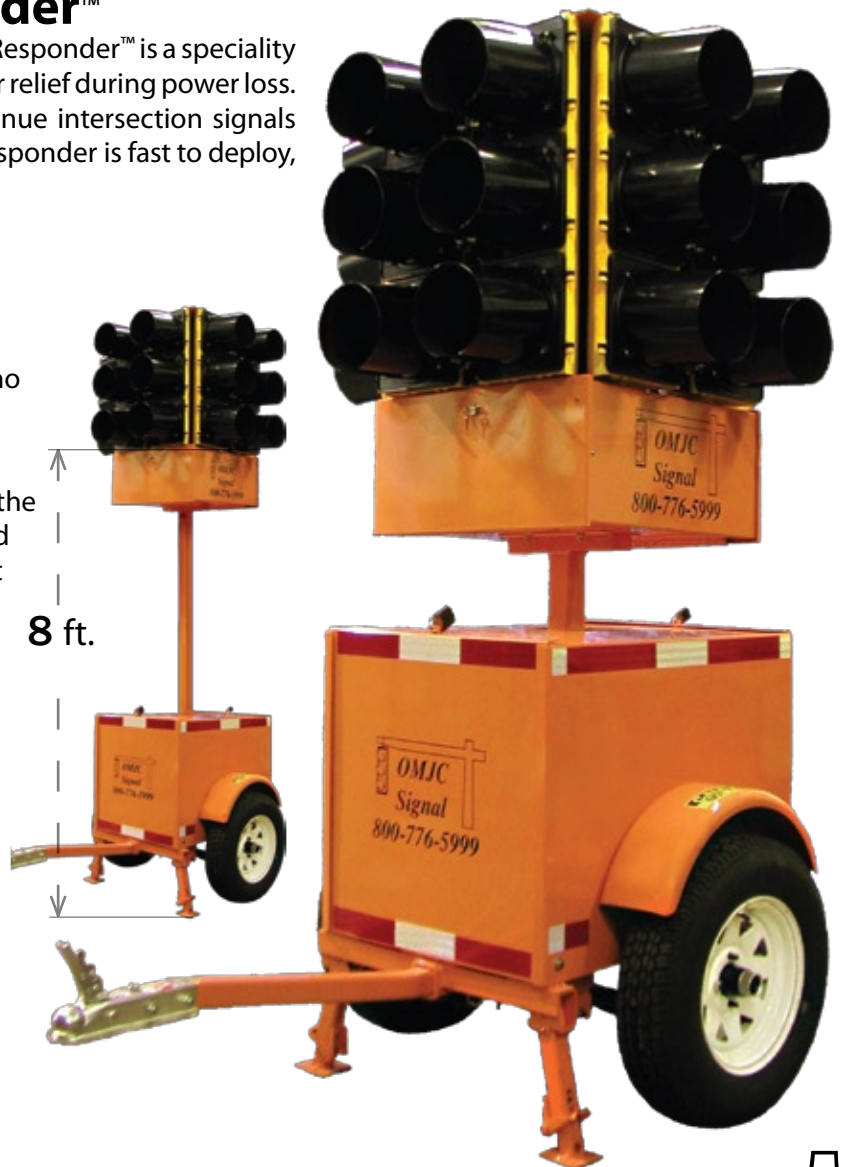

When the time comes you can be sure you are ready to respond quickly and with effectively no preparation.

- **Fast and Efficient**

Tow it in and drop it off. Lower the jacks, store the hitch, set your timers, crank up the signals, and get back to work. Powered with state of the art Absorbed Glass Mat batteries. Solid and arrow signals on four sides signal traffic as power is being restored.

- **Run Time**

The First Responder will run up to 14 days of continuous operation before a re-charge is needed. This is designed to provide a suitable time frame to complete permanent intersection repair.

Quality Control and Batteries

- A powerful traffic controller/ monitor
- No fuss, corrossions, or spills, -40 to +140°F, long life, and fast charging
