

Pop-Up KD

KNOCKDOWN

A CRISIS RESPONSE SOLUTION

The AC powered Knockdown (KD) functions as an emergency replacement when a traffic pole is knocked down at a permanent intersection. The 12", ITE approved signals, can quickly be placed in positions mandated by the MUTCD at the mere push of a button. The KD hard-wires into the preexisting intersection infrastructure. Because the footprint is only 6' wide (the narrowest in the industry), it can fit almost anywhere. The KD is available with 9', 15', or 25' arms depending on the application and situation. Optional 4 & 5 section signals with left turns in the overhead position are available with the 15' & 25' arms.

*As an add on feature, all OMJC Pop-Up trailers can function as Knockdowns.

A FAST SOLUTION THAT LETS YOU
RESPOND WHEN NEEDED.

Pop-Up KD

KNOCKDOWN

Pop-Up KD • STANDARD FEATURES & OPTIONS

ARM EXTENSION OPTIONS

	9'
	15'
	25'

SIGNAL HEAD CONFIGURATIONS

	Countless configurations depending on arm size including 1-3 overhead signals
