

Countdown Display Timer

Portable traffic signals are often outfitted with a countdown timer to ensure motorists who may not be used to portables that the signals are indeed operational. The countdown timer from OMJC Signal is particularly helpful in work-zones with longer cycle times. The timer itself gives motorists a time reference via an easy to configure, easy to read digital display that is mounted to the mast arm.

Specs

- Size: o 30"x20"x2.74"
- Weight: 29 lbs.
- Full matrix display
- Mounts to horizontal mast arm for optimal visibility
- Meets MUTCD Specifications
